

Dear Sir or Madam, One of the main reason that I purchased xmradio was due to the fact that the programming I wanted to listen to was never on. I wanted to listen to news,weather and music, but due to the massive amounts of commercials I could never find the programming I wanted from the radio.

Xm is a paid for service and it should have the right to choose the programming it wants to provide. It does that with user feedback and funding. The government should reject NAB petition 04-160 and allow the people who pay for xm to decide what is played on xm radio.
